Choo-Choose to have some train fun with us

In this exciting flight of activities preschoolers and adults can have some fun without going *off the rails*. All activities are minds-on with a focus on those fun locomotives that move us still today.

For this age-group there is no specific curriculum addressed, these programs are great for all learners, just adjust the activities to suit and have fun!

Activity One: Got Your Number

What you need:

Print out the 'Got Your Number' PDF worksheets.

No printer? Just have them on a screen or create your own.

Small toy train, optional.

Instructions:

With the 'Got Your Number' worksheets in front of your learner, model using your finger (or a small train) to draw the number and spell out the number.

The repetitive nature of the activity will help develop muscle and mind memory to create the numbers and recognize them.

Want to lengthen the activity? Have your learner use objects to help count the numbers out. The objects could be chocolate chips, blocks, crackers. Tip: Edible objects can help at snack time!

Train noises are strongly encouraged. Happy chugging and choo-choo-ing!
