## Choo-Choose to have some train fun with us

In this exciting flight of activities preschoolers and adults can have some fun without going *off the rails*. All activities are minds-on with a focus on those fun locomotives that move us still today.

For this age-group there is no specific curriculum addressed, these programs are great for all learners, just adjust the activities to suit and have fun!

### Activity Three: I Spy: Terrific Trains

#### *What you need:*

View on a screen or print out the ‘I Spy: Terrific Trains’ image.

#### *Instructions:*

“I Spy with my little eye, a lot of fun things in this picture!” Using the text accompanying the image look for all the items.

Did your learner have a lot of fun? Much like the original I Spy books your learner could create their own hunt to challenge an adult or another learner. Or to extend the fun further, create their own I Spy “set-up” in real life or digitally to share.
