Impacts on Property Tax Grey County

Farm Tax Class Burden 2001-2020

% of total county Taxes from Farmland

Farm Tax Burden 2016-2020

% of total county Taxes from Residential

Avoiding a Shift in Property Tax Burden

- To avoid a property tax shift onto farmland property owners your local county governments will need to adjust the Farm Property Tax Ratio below the current 25% of residential taxes.
- How much they need to adjust the tax ratio will depend on the assessment changes in your county.
- County governments have full authority to adjust the farm tax ratio anywhere between 0%-25% of the local residential tax rate each year.

Farm Tax Ratio Required in Grey County

- For Farm Property Owners to maintain the current proportion of tax Burden (4% of total tax) would require the following adjustments to Tax Ratios over time.
- ~~2017: 0.21~~
- ~~2018: 0.22~~
- 2019: 0.224
- 2020: 0.203
- Note this is not a tax break, farm property owners will still be paying more taxes each year, they will simply be paying the same proportion of taxes.
